

ICE Publishing eBooks and eJournals 2024

Rigorous: ICE Publishing from Emerald offers high quality, peer-reviewed books and journals which are essential resources for researchers and practitioners world-wide.

Fact: All ICE Publishing journals are indexed in the Compendex on Engineering Village, 34 journals are indexed in Scopus and 32 are indexed in Web of Science. Flagship geotechnical journal *Géotechnique* achieved a record impact factor of 5.8 in 2022 (Clarivate Analytics, 2023).

Global: The ICE Publishing journals programme offers a range of global viewpoints, supporting the growth of international engineering, environmental science and materials science research and practice.

Fact: In 2022, authors from 87 different countries published articles in ICE Publishing journals and over 50% of the usage of ICE Publishing Virtual Library in 2022 stemmed from beyond North America and Europe.

Change-focused: We are passionate about supporting researchers to influence real-world change in society and minimise the environmental impact of structures and infrastructures.

Fact: ICE Publishing content aligns with United Nations Sustainable Development Goals (SDGs) and content is tagged with the relevant goal(s) to help civil engineers meet the 2030 net zero target.

Sought after: Our remarkable collection of journals and books provide a gold-standard reference point for academia and industry; and they are purchased and used by prestigious institutions around the world.

Fact: With over 1,500 books covering 10 different subject areas, ours is the most substantial civil engineering eBook collection in the world and includes reference works, edited collections, manuals, specifications and best practice guides. In 2022, there were more than 1.7 million downloads to content on the ICE Publishing Virtual Library.

Influential: Influencing society is at the heart of ICE Publishing, with titles intended to benefit society by improving the built environment.

Fact: The ICE Manual of Blue-Green Infrastructure received a special mention in the press release for Natural England's new Green Infrastructure framework commitment in the UK Government's 25 Year Environment Plan.

ICE Publishing from Emerald is a leading provider of content for global researchers and practitioners in civil and environmental engineering and materials science. With 35 peer reviewed journals, over 1,500 books and an archive of over 36,000 research articles dating back to 1836, ICE Publishing has long been at the cutting edge of civil engineering research and is a critical resource for industry and academia.

Who are we?

Championing fresh thinking has been at the heart of Emerald Publishing since foundation over 50 years ago, and we're excited to have recently acquired ICE Publishing, who share our goal to deliver positive real-world change through evidence-led research. Through publishing inter-disciplinary and global research, we support academics and practitioners to create something powerful and influence society for the better.

What you can expect, working with us

With you every step of the way:

Our local customer support teams are available across a range of timezones to help you with any issues. We also have support and guidance available 24/7 on our Customer Support portal at emeraldpublishinggroup.freshdesk.com/support/solutions

Manage your account:

You'll be able to see what content is being used, add branding, run reports, manage your authentication settings and view your current access through your Institutional Account page.

Getting the most out of your ICE Publishing content:

Download our toolkits and user guides to get everything you need from your ICE Publishing content.

ICE Publishing access options to suit all

Your Business Manager will work with you to discover the most suitable option based on evidence and your needs, with a range of options for archive, rental and access in perpetuity.

- **ICE Publishing Journals Collection:**
 - Complete collection (Archive access back to 1836)
 - Current collection (Archive access back to 2003)
 - Science collection (available when purchasing either Complete or Current collection)
- **ICE Publishing Books Collection:**
 - Complete collection
 - eBook Select
 - Evidence-based acquisition model available

ICE Publishing eBooks and eJournals are available through ICE Virtual Library

- Atypon powered platform for an exceptional user experience
- No DRM
- Supports Shibboleth, Azure and Athens for ease of access
- COUNTER compliant usage reports
- KBART and MARC
- Secure archiving with Portico
- OpenURL links and DOIs at title, article and chapter level

Our commitment to positive change:

Diverse voices

To boost the visibility of diverse communities and highlight the highest quality global engineering research, the ICE Publishing Overseas Prizes are awarded annually for the best articles in ICE journals stemming from authors outside the UK.

Research impact and impact literacy

Research impact is at the heart of ICE Publishing, and we publish a large range of books that focus on real world impact - including working practitioner titles aimed at civil engineers and architects; content on sustainability, infrastructure and urban design aimed at policy makers and local government; titles for contract experts and lawyers.

Acting ethically and responsibly

In 2022, ICE Publishing launched a United Nations Sustainable Development Goals (SDGs) resource centre, mapping ICE content to SDGs to ensure that the research we publish supports engineers to improve lives.

Supporting all forms of open research

Both Emerald and ICE Publishing aim to help researchers make their findings open to all, giving them the opportunity to create real impact and drive positive change across the world. Launched in 2014, *Geotechnical Research* was the first gold open access journal in its field.
